Hepatitis C Prevention Program (HPP)

If you are living with hepatitis or think you might be at risk of contracting it, there are steps you can take to stay well. Hep C is transmitted by blood-to-blood contact but can be cured with treatment.

Have you been exposed to Hep C?

- Pre 1990 blood transfusion (blood products)
- Sharing needles or other injecting equipment
- Unsterile piercing or tattooing equipment

Testing and treatment?

Ask your local GP or contact Anglicare and a worker can support you through the process.

To make an appointment phone 1800 243 232 or email connectsupport@anglicare-tas.org.au

*The Hepatitis Prevention Program
is supported by the Crown through
the Department of Health Tasmania*
