

# Tasmania Fire Service

## Home fire safety assessment and risk reduction.

Tasmania Fire Service

**A home fire safety training session for people working in the  
aged, disability, community, health services and social housing sectors**

This free session is provided by Tasmania Fire Service and aligns with the community services and health sector best practice standards in providing essential information and resources of home fire risk assessment, risk reduction and risk management supporting workers, volunteers and people living in their homes to be safer.

It will help you:

- reduce the risk of fire in the workplace when the workplace is a consumer's home
- help consumers to understand and practice basic home fire safety
- inform consumers about the risk of fire in their homes
- help consumers to think about ways of safe escape and to use these ways if there is a fire in their home
- help consumers to understand and to fully recognise the risk of fire in their homes and
- reduce the risk of fire injuries and/or fatalities in the home.
